EDUCATION

New Jersey Institute of Technology

September 2020 - May 2025

Bachelor of Science in Business (Concentration in Finance)

Newark, NJ

GPA 3.38 / 4.00

Dean's List, Member of Fintech Club (2023/2025), North African Society (2024/2025), and Iranian Cultural Association (2024/2025)

PROFESSIONAL EXPERIENCE

Lending Operations Intern

June 2023 – Aug 2023

Unity Bank

Clinton, NJ

- Supported accounts receivable and collections operations for SBA loan portfolios, ensuring timely reconciliation and data accuracy.
- Used Excel and internal reconciliation systems to track payments, validate balances, and maintain proper documentation.
- Assisted with data validation and discrepancy resolution across client accounts to support accurate financial reporting.

Client Account & Reporting Analyst

June 2020 - Present

Captain Investor Capital LLC

Baltimore, MD

- Analyzed real estate investment opportunities by reviewing property financials, cash flow, and return metrics to support decision making.
- Performed variance analysis and prepared financial statements in accordance with GAAP principles and company policy.
- Prepared audit and compliance documentation and performed bookkeeping to align projects with company standards.

PROJECTS

Customer Analytics & Churn Modeling | Excel, VBA, Tableau

- Cleaned and structured 1,000+ customer records in Excel, standardizing formats and resolving duplicates and missing values.
- Developed VBA macros to automate data cleaning, refresh calculations, and prepare datasets for analysis.
- Built an interactive Tableau dashboard to visualize churn rates, customer segments, and KPIs for management reporting.

Markowitz Portfolio Optimization | Python, Excel, Tableau

- Retrieved and analyzed 3–5 years of historical price data for 5–8 publicly traded equities using Python (pandas, numpy).
- Calculated expected returns, volatility, and covariance matrices; simulated 10k+ portfolio allocations to construct the Efficient Frontier.
- Identified minimum-variance and optimal risk-adjusted portfolios, achieving ~20–30% risk reduction through diversification.

Weather App | HTML, APIs, JavaScript, CSS

- Built a responsive weather app with HTML/CSS and a clean UI for city + country lookup.
- Integrated the OpenWeatherMap API using jQuery AJAX, displaying real-time weather metrics (°F/°C, humidity, wind, “feels like”).
- Implemented input validation and error handling to manage invalid locations and failed API requests.

SKILLS

Technical | Excel, Python, SQL, HTML, Tableau, Power BI, JavaScript, CSS, SPSS

Analytical & Business Skills | Data-driven decision making, Forecasting, Optimization modeling, Dashboard reporting, Process automation, KPI definition & performance tracking, Stakeholder communication & reporting, Cross-functional collaboration
